

### 33 *Cercocarpus intricatus* Slickrock Sparse Vegetation Littleleaf Mountain-mahogany Slickrock Sparse Vegetation

---

Association:

-*Cercocarpus intricatus* Slickrock Sparse  
Vegetation

Common species:

*Cercocarpus intricatus*  
*Arctostaphylos patula*  
*Pinus ponderosa*  
*Pinus edulis*  
*Purshia stansburiana*

Project Specifics:

Frequency = 1,248 total polygons  
1,049 polygons ZION, 199 polygons Environs  
Area = 4,631 total acres  
3,723 acres ZION, 908 acres Environs  
Average Size = 4 acres

**Photo Signature Example**

Description:

This widespread map class was found throughout the Navajo, slickrock portions of ZION. This type was extremely sparse, occurring in rock crevices, canyon walls, and small ledges. Other shrubs such as manzanita and cliff-rose may be present and partially distort the photo signature. Extremely sparse stands of ponderosa pine and pinyon pine may also intermingle with this map class.
